

~~(3) of holes extending, in essence,~~ in parallel to each other and in a main direction;
characterized in that further comprising

at least one layer of strips ~~(4)~~ consisting of a film material and extending in the main direction ~~(X)~~ wherein at least one layer of strips is attached to the base ~~(1)~~ between the rows ~~(3)~~ of holes.

2. (Currently Amended) Stretch film according to Claim 1, **characterized in that** wherein the width of at least a part of the strips ~~(4)~~ extending in transverse direction in relation to the main direction ~~(X)~~ is dimensioned such that the strips ~~(4)~~ each reach up to the rows ~~(3)~~ of holes adjacent to said strips.
3. (Currently Amended) Stretch film according to Claim 1 ~~or 2~~, **characterized in that** wherein several layers of strips ~~(4)~~ are attached to the base ~~(1)~~ one above the other and that the strips ~~(4)~~ that are arranged one above the other each comprise the same width.
4. (Currently Amended) Stretch film according to ~~one of Claims 1 through 3~~, **characterized in that** Claim 1, wherein the strips ~~(4)~~ ~~are, in essence,~~ are generally even, but at least without wrinkles.
5. (Currently Amended) Stretch film according to ~~one of Claims 1 through 4~~, **characterized in that** Claim 1, wherein the strips ~~(4)~~ are attached to the base ~~(1)~~ or the associated strip ~~(4)~~ carrying said strips by adhesion.
6. (Currently Amended) Stretch film according to ~~one of Claims 1 through 5~~, **characterized in that** Claim 1, wherein the strips ~~(4)~~ are applied without sealing or bonding.
7. (Currently Amended) Stretch film according to ~~one of Claims 1 through 6~~, **characterized in that** Claim 1, wherein the holes ~~(2)~~ can be made by utilizing a thermal irradiation method without touching the base ~~(1)~~.

8. (Currently Amended) Stretch film according to Claim 7, ~~characterized in that~~ wherein each hole (2) is surrounded by a bead having a thickness that exceeds a thickness of the base (1).
9. (Currently Amended) Stretch film according to ~~one of Claims 1 through 8, characterized in that~~ Claim 1, wherein the holes (2) of neighboring rows (3) of holes are staggered in relation to the main direction (X).
10. (Currently Amended) Stretch film according to ~~one of Claims 1 through 9, characterized in that~~ Claim 1, wherein the base (1) is prestretched together with the strips (4).
